FUNNEL | View 61,252 > Cart 12,538 > Checkout 5,034 > Purchase 2,856
Step conversion: 20.5% > 40.1% > 56.7%. Step drop-off: 79.5% > 59.9% > 43.3%. Overall view-to-purchase: 4.66%.
View-to-cart drop-off by channel: Paid Search 80.9% (2,521 lost); Organic Search 80.2% (18,200); Referral 79.6% (7,512); Other 78.9% (9,083); Direct 78.7% (11,398).
Prioritize product-page relevance and add-to-cart friction across channels. The 2.2-point spread does not support blaming one channel alone. Closed, ordered, per-pseudo-user funnel across sessions; acquisition channels, not session last-click. Daily users cannot be summed into quarterly unique users.

PART 2 | NorthPeak Q3 2026 - decision view
Keep total media spend at $159,034.78. Reconciled paid-channel Shopify value: $1,241,991.09 | blended ROAS: 7.81x.
TikTok is under-credited in GA4 by $256,351.20; code + landing-page evidence recovers 3,314 orders. Rebalance with controlled tests, not an assumed forecast.

1 - 4 / 4

Q4 | Same $159,034.78 total, different allocation
Google +10% ($72,723.81): strongest observed ROAS. TikTok +20% ($47,287.36): first-party order evidence reverses GA4 weakness.
Meta -22.4% (~$34,498.56) funds the increases. Snapchat -50% ($4,525.06) retains a learning test on the lowest observed return. Phase changes and validate contribution margin and holdout lift.
CRM: 1,315 records / 1,245 emails; 70 emails repeat and 34 conflict on channel. Do not use as-is. Keep $387,381.09 of Customer contract value separate; pipeline is not realized revenue. No Shopify email matches were found.
Scope: gross Shopify totals include tax/shipping. TT20 + TikTok path agree on 3,990 orders; other path-to-channel assignments are assumptions. Value definitions and attribution windows require audit; exact causes are not proven. Fix timestamped UTMs and stable contact/deal/payment IDs before buying attribution software.
